## Description

We are delighted to be able to offer this stunning example of Mercedes-AMG's latest supercar finished in Designo Iridium Silver Magno paint it looks simply stunning! The interior is almost as impressive where you are held in by the AMG Performance seats so you can admire the extensive range of extras fitted in comfort!!

When the "Formula 1" manufacturer's champion claims that "Never before has Mercedes-AMG packed so much motorsport technology into a production vehicle" you have to take the car very seriously. Developing a massive 577 bhp from it's 4.0 V8 engine is just the start, 516 lb ft of torque from 1,900 rpm is the real star - some 177 more than a Porsche GT3 which needs to get to 6,000 rpm to produce this. Pair these figures to a weight reduction of 30kgs (from the GTS model) even despite its extra width, and you achieve a 0-62 mph time of just 3.6 seconds and top speed of 198 mph. All of this power and speed is controlled by not only the visible aero package fitted to the car but also the Active Aero Front Spoiler and Active Rear Axle Steering - a first for Mercedes-AMG.

This model is every inch the supercar it was designed to be and our car has been carefully specified to enhance the

wonderful standard specification not just in looks, but also dynamically. The extensive list of fitted options is shown below in the bullet points and for clarity the options packs included contain :
